ABSTRACT

The report consists of computer printouts of statistical data by State. Programs were financed by Federal, State and local funds and were conducted under the approved State plan for vocational education. Federal funds used to support the State programs were authorized by the Vocational Education Act of 1963, as amended (PL 90-576). Data were compiled from annual vocational education reports. No information was available from American Samoa and the Virgin Islands. The series of State-by-State tables includes 24 relating to expenditures, three relating to number of teachers, one dealing with teacher training, 21 relating to enrollments in various programs, and four relating to placements of program completions. Sample annual vocational education report forms are appended. (Author/MW)

FOREWORD

This report, the third in the "Vocational Education Information" series for fiscal year 1973, consists of computer printouts of statistical data by State. Programs were financed by Federal, State and local funds and were conducted under the approved State plan for vocational education. Federal funds used to support the State programs were authorized by the Vocational Education Act of 1963, as amended (P.L. 90-576). Data were compiled from vocational education reports which are submitted annually on forms provided by the U.S. Office of Education. (See Appendix.) Reports were not received from American Samoa and the Virgin Islands at the time of this compilation. Where no data is reported by the State for a specific item, a "0" is indicated on the table.

The series of State-by-State tables include 24 relating to expenditures, 3 relating to number of teachers, 1 dealing with teacher training, 21 relating to enrollments in various programs, and 4 relating to placements of program completions. It should be noted that certain tables cannot be precisely compared due to rounding into thousands and the inability of a few States to supply the detailed data. Fiscal data are subject to audit and are to be considered provisional.

Due to changes in reporting requirements and new legislation, some of the statistics are not necessarily compatible with those published in previous years. However, the State data should prove useful to all persons interested in assessing the scope and progress of vocational education in the United States and particularly those individuals who are concerned with planning and evaluation.

SECTION I – NUMBER OF TEACHERS REPORTED AS FULL-TIME EQUIVALENTS AND STATUS OF TEACHER TRAINING

NOTE: Report all teachers of vocational education employed during the fiscal year who meet the standards of the State plan.

A full-time vocational education teacher is one carrying a vocational teaching assignment that contains at least the minimum number of hours considered by the State board or local educational agency to be the recognized full-time load of a person engaged for a normal work day and week in the program.

A part-time vocational education teacher is one carrying a vocational teaching assignment that contains less than the minimum number of hours considered by the State Board of local educational agency to be the recognized full-time load of a person engaged for a normal work day and week in that program.

Column (b). On line 1 report the total number of persons teaching vocational education in the State. In this unduplicated total, a person is counted only once even though he may be reported in two or more programs *(lines)*. Do not include in line 1 the number of persons reported on lines 13-16, since this is a duplication. On lines 2-12 and 17, report the number of persons teaching in each program listed. A person is counted once even though he may be reported in two or more levels. On lines 13-16, report the number of teachers entered on lines 2-12 and 17 providing services to particular target groups or in special programs.

Columns (c) and (d). On line 1, report the total number of full-time equivalents at the secondary and postsecondary levels. On lines 2-17 report the full-time equivalents for each program listed. Count only full-time and part-time teachers filling positions. DO NOT count unfilled positions.

> Full-time equivalency of assignment is the amount of employed time that is normally required of a teacher to perform a less-than-full-time assignment within an assignment classification in proportion to that normally required in a full-time assignment in the same assignment classification, with "1.0" representing one full-time assignment. It is derived by dividing the amount of employed time normally required in the less-than-full-time assignment by the amount of employed time normally required in a corresponding full-time assignment. Full-time equivalency of assignment should be expressed as a decimal fraction to the nearest tenth.

For each vocational teaching assignment category determine the full-time equivalency of each teacher. The sum of the equivalencies of each teacher within an assignment category should be entered in the appropriate space on the form.

Examples: 1. Each person assigned full-time to a position category should be counted as 1.0.

2. A person employed full-time, but assigned to more than one vocational teaching category should be counted part-time in each category, e.g. a person who spends 3 days per week as an agriculture teacher and 2 days as a group guidance teacher should be counted 0.6 as agriculture, and 0.4 as group guidance.

3. A teacher aide employed 2 hours per day in a school system with a 6-hour day should be counted as 0.3.

Columns (e) and (f). On line 1 report the total number of full-time and part-time teachers who teach at the adult level in vocational education. This is an unduplicated total. A person is counted only once even though he may be reported in two or more programs. On lines 2-17, report the number of full-time and part-time teachers for each program.

Column (g). Enter total enrollees in preservice teacher training programs who had not entered upon the regular vocational instructional activities for which they were preparing. Do not report a number on line 16.

Column (h). Enter total number of enrollees in inservice teacher training programs.

Column (i). Enter total number of completions of those reported in column (g) and who also completed State plan requirements.

Column (j). Enter total number of completions of those reported in column (h) and who also completed State plan requirements.

SECTION II – LOCAL ADMINISTRATIVE PERSONNEL

DESCRIPTIVE REPORT OF PROGRAM ACTIVITIES FOR VOCATIONAL EDUCATION

(Vocational Education Amendments of 1968, Public Law 90-576)

FORM APPROVED
O.M.B. NO. 51-R0841

FISCAL YEAR ENDING	REPORT DUE
June 30, 19	October 1, 19

OUTLINE FOR DESCRIPTIVE REPORT

Information supplied can form the basis for an objective evaluation by the State Vocational Education Agency as to how well it met the objectives which were established in the State plan. It will also further the exchange of information and services between the State Educational Agency and the Office of Education and enable the latter to obtain information which can be utilized in the further implementation of the Vocational Education Acts.

This report will provide the Commissioner of Education with information needed for his annual report to the Congress and the Nation. The determination of emerging needs and trends revealed by a study of this and other similar information will assist in the formulation of new Federal legislative programs and the recommendations of new policies and procedures relating to program operations.

PROGRAM DEVELOPMENT AND ACCOMPLISHMENTS.

Describe in detail below *(by Part)* the accomplishments of the objectives as set forth in the Annual Program Plan, and in the Long Range Plan, of the current State plan. Indicate the accomplishments, or failure to achieve the objectives, in terms of resources utilized, articulation with other programs, levels or agencies, transition from school to work, employer's involvements, and occupational needs, where applicable.

STATE PROGRAMS

Part B of the Act.

1. Accomplishments for each of the five categories of persons served, as set forth in the Annual Program Plan. Indicate by level of education the average school time students spend in vocational education, for example, 20 percent of 6-period secondary school day, 67 percent of postsecondary course load, 36 clock hours per year for adult classes. If programs vary widely, group OE instructional programs by categories of time to show the range and distribution.

Indicate the estimated percentage distribution of: (1) total funds expended for handicapped persons; (2) Federal funds expended for handicapped persons; and (3) enrollment of handicapped persons by the type of handicap; i.e., trainable mentally retarded, educational mentally retarded, hard of hearing, deaf, speech impaired, visually impaired, emotionally disturbed, crippled, learning disabilities.

2. Accomplishments in terms of the geographical distribution of allocations of funds for vocational education for the categories of persons served by the degree of priority given to the types of areas designated in the Long Range Program Plan, as set forth in the Annual Program Plan.

3. Accomplishments of objectives or activities as shown in the Annual Program Plan, for programs under contract; vocational guidance and counseling; construction of area schools, ancillary services and activities and State programs for the disadvantaged under Section 102(b).

SPECIAL PROGRAMS

Part C of the Act.

Describe the objectives accomplished by the research coordination units, ongoing research, training, and pilot programs contracted during the fiscal year.

Part D of the Act.

Describe the objectives accomplished by the establishment, operation, and evaluation of exemplary programs and projects. Include the estimated number of persons served in each type of activity by level and target group.

Part F of the Act.

Describe the objectives accomplished for consumer and homemaking educational programs of instruction.

Part G of the Act.

Describe the objectives accomplished for instruction furnished in cooperative vocational education programs.

Part H of the Act.

Describe the objectives accomplished in work-study programs.

OTHER INFORMATION REQUESTED

1. List and briefly describe the highlights of 3 – 5 exceptional or model programs, using the following outline:

Type of program

Location

Funding source

Persons served *(number, sex, age, grade, income, handicaps, location, racial/ethnic, etc.)*

Instructional content and other services provided

Method of instruction *(classroom, shop, cooperative)*

Intensity of program *(time per week, weeks per year)*

Program effectiveness *(school retention, completion, placement, earnings, etc.)*

Cost per student *(instructional, other)*

2. Describe the State's activities and services of vocational youth organizations as they relate to the programs of vocational education.

3. Report findings, if any, of kinds *(newly identified or continuing)* of vocational education not being adequately provided, and occupational or employer-expressed categories of demand. Indicate specific translations of such findings into new programs or services more effective – either to improve quality of productivity, or to reduce unit costs. Categorize the recommendations as to things the State itself can do and things requiring Office of Education or Congressional action.
